### PRESIDENT'S MESSAGE

The year is off to a great start for the Western Chapter, and the balance of the year looks to be engaging!

The first major event of the year was Environmental Connection 2016 in San Antonio, Texas. The event seemed destined for a disappointment when a month before opening day, the networking event "A Texas Home Compañero" was cancelled without explanation. This was unfortunate because the Western Chapter Meeting at EC 16 was being planned as a segue to the Compañero. EC 16 began to redeem itself with the opening General Session where attendees were serenaded by the Mariachi Band from a nearby high school – these kids exhibited amazing talent and provided a great touch of San Antonio to the conference.

EC 16 featured a stellar series of technical presentations, several field tours, and a large exposition hall with nearly 150 exhibitors. Overall, the technical sessions were top notch: the one-hour slots for each presentation allowed for speakers to get into the details of their subject matter and to address questions. The Exposition Hall was filled with exhibitors covering pretty much all products, services, and equipment needed for erosion prevention and sediment control.

There were about 125 individuals from the Western Chapter area at EC 16, and many of them made it over to the **Western Chapter Meeting**. After a few opening remarks, including an update on what's going on in the Western Chapter, the Chapter Meeting transitioned to networking. Thanks to the generous support of Western Chapter Meeting sponsors, the networking occurred for several hours, with nourishment provided via great food and thirst quenched through adult beverages. As usual, a number of IECA members from other Chapters made their way over to the Western Chapter Meeting where they knew the networking would be fun!

Next up for the Western Chapter is the **Erosion Control BMP Summit** at Shasta College, May 3-4, 2016. Western Chapter is co-sponsoring this event with the Sacramento Watershed Action Group and Shasta College. The Erosion Control BMP Summit is an excellent opportunity to earn Professional Development Hours (PDHs) for certification renewals, and to provide your staff with some outstanding training. If you can't make this event yourself, consider sending some of your staff. I have two staff attending again this year and both are looking forward to the event, especially given the rave reviews of last year's BMP Summit.

The Western Chapter is coordinating vendor exhibits for the Erosion Control BMP Summit. Opportunities are limited, so if you would like to exhibit or to showcase a product during the field day, please contact the Western Chapter immediately.

*(Continued on Page 5)*

**Jeff Endicott**  
PE, BCEE, CPESC,

**Be All You Can Be – many hands do make light work!**

*An organization is only as strong and active as its members-will you become an active member?*

*Please see the [Committees](#) list on the Western Chapter's [website](#) to see how your talents and interests may benefit your peers and email the chairperson of that committee today!*

### CALL FOR ARTICLES

*Do you have a technical article, regulatory update, or event announcement you'd like to share with your fellow members? Please forward articles to Cyndi at [westernchapter@gmail.com](mailto:westernchapter@gmail.com) and we'll publish them in the next issue of Western Chapter News! Thank you!*

## WESTERNCHAPTER SCHOLARSHIP AVAILABLE Deadline July 1, 2016

Please let students, your alma mater, alumni association and academic contacts know that the Western Chapter is offering an academic scholarship.

For 2015-16, we have one \$1,000 scholarship available for junior, senior or graduate school level students with a demonstrated interest in pursuing a career in the erosion and sediment control profession AND who are enrolled in a related degree-program at an accredited 4-year college or university.

Since erosion and sediment control is a cross-disciplinary field, a wide variety of degree-programs will be considered, such as engineering, hydrology, soils, geology, forestry, environmental studies, range management, watershed, ecology, natural resources planning, etc. Students must be enrolled in institutions within the four-state area of the Western Chapter: CA, AZ, NV, or HI.

Applicants must submit a 500-word essay, three letters of recommendation and post-secondary academic transcripts (unofficial transcripts will be accepted) along with the application.

Applications are due on July 1 of each year preceding the fall academic year to which the scholarship will be used. Awardees will be notified by August 15.

Interested students may download applications from the Western Chapter website, [www.wcieca.org](http://www.wcieca.org), or may contact Cyndi Brinkhurst at [westernchapter@gmail.com](mailto:westernchapter@gmail.com). Help us spread the word out about this exciting opportunity!

## BOARD OF DIRECTORS ELECTION

Please consider either nominating a qualified person or running for a Director position! Each July, three of nine Western Chapter Board full-term (three years) Director positions are up for election. This is one of the most fulfilling ways to increase your involvement in, and broaden your impact on, our industry. Qualifications; Must be a Western Chapter member (for at least one year) and currently reside in one of the Western Chapter's member states (California, Arizona, Nevada or Hawaii).

Key responsibilities for the Directors include managing and administering the Chapter as a not-for-profit corporation, creating educational opportunities for the Chapter members, helping the Chapter and IECA grow, and responding to member questions and concerns. The time commitment includes quarterly meetings and subcommittee work totaling ONLY five to ten hrs. per month.

Send your nomination OR submit a self-nomination and a candidate statement (a 200-word, electronically formatted, description of yourself and an explanation as to why you want to serve on the Western Chapter Board of Directors) by June 24, 2016 to Cyndi Brinkhurst, Administrative Assistant at: [westernchapter@gmail.com](mailto:westernchapter@gmail.com) or Fax: (530) 231-6181

Candidacy statements and ballots will be available at [www.wcieca.org](http://www.wcieca.org) starting on July 8, 2016 and the election will close on August 12. We will send you an e-mail reminder to vote.

## GET LISTED!

*Within the stormwater field we are always chanting – "reduce your exposure."*

*Well, here is a chance to **get targeted exposure** – contact Cyndi Brinkhurst at (530) 272-2407 or at [westernchapter@gmail.com](mailto:westernchapter@gmail.com) to reserve your ad space today!*

## GREAT JOB!

*Is your project going great? Did someone do a good job? Do you have a technical article, regulatory update, contractor to highlight or event announcement you'd like to share with your fellow members?*

*Please forward articles to the [westernchapter@gmail.com](mailto:westernchapter@gmail.com) and we'll publish them in the next issue of Western Chapter News!*

*Thank you!*

## NEW MEMBER-PUBLISHED BOOK: EROSION CONTROL AND LAND RESTORATION

The Western Chapter and IECA is proud to announce that another one of its members has a newly-published book called *Erosion Control and Land Restoration*, written by Pablo A. Garcia-Chevesich, Ph.D.

Originally from Chile, Dr. Garcia-Chevesich is constantly involved in research/development projects in several parts of the world. With a Masters in Forest Engineering and a Ph.D. in Agricultural and Biosystems Engineering from the University of Arizona, Dr. Garcia-Chevesich is a researcher, professor, consultant and expert witness in the field of watershed management. He has a strong focus on hydrology, erosion/sediment processes and control, land restoration and climate change mitigation from the natural resources management perspective. Garcia-Chevesich is an IECA Western States Chapter Board Member and the US Ambassador for UNESCO's International Sediment Initiative.

He originally started writing the book back in 2007, while he was taking care of his ill father in the hospital. "I had the night shift," says Garcia-Chevesich. His inspiration to write the book spun an experience he had trying to research Spanish literature related to erosion and sediment control. "I realized that there was nothing in Spanish, so I wrote a book in that language. However, later on I noticed that the literature in English was also very sparse, except for some manuals or research books, and there were few books covering the whole area," he says. Several years later, and "with the support of some IECA members," he attributes, he was finally able to write his "encyclopedia" of erosion and sediment processes and control.

He admits that although it's not his first book – he has authored and co-authored 11 books in English and Spanish – "this one is one of the more comprehensive and enlightening." He intended this book to serve as a handbook, field manual and a reference guide to write project/grant proposals. It is his hope that this book is used by anyone dealing with natural resources management, alterations in the soil-water-plant relationship or the application of engineering principles to restore eroded or altered land – "that is, researchers, professors, students, consultants and other professionals," Garcia-Chevesich says.

Available in English and Spanish, this book is "a great resource for undergraduate, graduate, and short courses focused on soil conservation, erosion/sediment control and land restoration practices in many countries worldwide," he says.

By purchasing this book, you are contributing to the SOIL Fund of the International Erosion Control Association, which provides worldwide resources for land restoration projects that benefit poor communities. You can find *Erosion Control and Land Restoration* on Amazon.com and at Barnes & Noble bookstores.

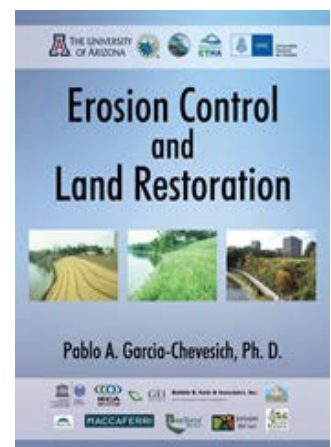

Pablo A. Garcia-Chevesich, Ph.D. has a special passion for education and helping others through teaching and training. "Mankind is currently facing three main issues: global warming, overpopulation and soil erosion and desertification. My area of expertise is on the third one, and the best way to solve the issue is to teach others how to recover degraded land. Worldwide an area equivalent to 36 football fields is lost every minute due to erosion and desertification processes, so I can't do this on my own," he says.

**Pablo Garcia-Chevesich PhD**  
**University of Arizona**  
**WCIECA Technical**  
**Vice President**  
**pablogarciach@gmail.com**  
**(520) 245-4552**

Pablo has a special passion for education and helping others through teaching and training. "Mankind is currently facing three main issues: global warming, overpopulation and soil erosion and desertification. My area of expertise is on the third one, and the best way to solve the issue is to teach others how to recover degraded land. Worldwide an area equivalent to 36 football fields is lost every minute due to erosion and desertification processes, so I can't do this on my own," he says.

Garcia-Chevesich plans to continue to write and publish more. In fact, the generous contributions of the International Sediment Initiative of Unesco, has helped him in leading an international effort to write a book on how various countries are dealing with sediment management. "I invite all IECA members to contribute if they want," he concludes.

*This book was dedicated to Garcia-Chevesich's sons, Daniel and Taran, who he calls "pollos hermanos," which means the chicken brothers.*

Shasta College Erosion Control Training Facility (ECTF)

## TRAININGS

### IECA Webinars -

IECA hosts over 15 webinars per year. Vendor Webinars are free to members, so take advantage of that benefit and register today to get your 1 free PDH. To learn more about the upcoming webinars, visit [www.ieca.org/webinars](http://www.ieca.org/webinars). Also, be sure to take advantage of your 2 free IECA Webinars per year - for Professional Plus members or higher. The benefits keep adding up!

[April 20 - Hydromodification - Causes, Effects, and Mitigation](#)

[May 18 - Gully Analysis and Control](#)

[June 15 - Building Green: Atlanta's Green Infrastructure Approach](#)

### New eLearning Library – Over 150 Courses

Did you know that members can earn 10 Professional Development Hours for free? Click the link below, then click on "Free to Members" link at the top. Be sure you're logged in as a member on IECA's website to gain access. All of our courses have member pricing, so you're saving hundreds on our 150+ eLearning courses. Explore library by visiting: [www.ieca.learnercommunity.com](http://www.ieca.learnercommunity.com).

## SHASTA COLLEGE HOSTS INTERNATIONAL EROSION CONTROL BMP SUMMIT

Shasta College will host its third Erosion Control BMP Summit on May 3 and 4, 2016 from 8am to 5pm at the Shasta College Erosion Control Training Facility (ECTF) and Farm. The ECTF is becoming world famous because the 5-acre site mimics an actual construction site and is also the training ground for the Heavy Equipment Operations classes.

This international workshop is a gaining participation of our industry partners from France and the Marianas Islands!! This workshop is a partnership with Shasta College, the *Doing What Matters for Jobs and the Economy* framework, Sacramento Watershed Action Group (SWAG), Western Chapter International Erosion Control Association (WCIECA), and the North Far North Consortia.

Instructor John McCullah (SWAG and Shasta College instructor) with help from staff and students will present and demonstrate the most effective Best Management Practices (BMPs) you can use for Construction Stormwater Protection. Special guest presenter will be Eric Berntsen, formerly with the State Water Board. Eric has extraordinary experience with municipal MS4 regulations and in the area of hydromodification. The two-day workshop is designed for people of beginning, intermediate or advanced erosion control experience. It will be extremely beneficial for Storm Water Pollution Prevention Plant (SWPPP) developers, reviewers, engineers, construction personnel, site inspectors, landscape contractors, and other water-quality professionals.

BMPs are the "tools of compliance". How can stormwater plans truly become cost-effective without an in-depth understanding of the BMPs and BMP selection, including how and where they should be applied, how to install and how to repair. This training is focused on the practical, in-the-field, implementation and inspection of BMPs. Attendees will spend time both in the classroom and out in the field, spraying on hydromulch or helping to anchor turf reinforced mat (TRM) or rolled erosion control products. Speaking of products, there will be a huge product exhibition, with manufacturers, developers, and distributors of erosion and sediment control products from around the nations. Many products will be demonstrated in the field and exhibit hall.

Attendees will have ample opportunity to mingle, not only with product distributors but also, with other professionals working in this ever-growing field. Shasta College students who are actively receiving this training in their curriculum will be on hand.

Contractors and installers will be given tips to save money and still install BMPs they can be proud of. The silt fence "slicing" machines that can install silt fence properly in 1/3 of the time and cost will be demonstrated. Learn how to construct a simple sediment pond that drains by skimming cleaner water from the top. See how implementing these NEW pond design principles can make your ponds 90% effective. Runoff control, controlling the tractive forces of flowing water, can often be achieved sustainably with vegetative lined channels. Shasta College has constructed drainage ways where you'll learn everything you need about Turf Reinforcement Mats, the state-of-the-art site grading and soil surface preparation BMPs that are most effective.

John McCullah, on behalf of SWAG, will also be hosting our partners from French ONEMA (French National Agency for Water and Aquatic Environments) as they not only attend our workshop, but tour local sites for one-on-one hands-on training with John throughout the remainder of the week. There will also be attendees from the Bureau of Environmental and Coastal Quality from the Commonwealth of the Northern Marianas Islands.

This is sure to be an event that you don't want to miss out on!! Registration is \$300.00 person, with group rates available. Discounts of 30% will be given to State, Federal and Local agencies with groups of 5 or more and early registration. Scholarships are also available to small businesses involved in Erosion Control. Registration includes breakfast and lunch for both days.

The Red Lion hotel is holding 30 rooms (double queens) for us for the nights of May 2nd and 3rd for the state rate of \$90 a night. Breakfast is not included in the hotel's rate, but is provided at the workshop. A mixer will be held at 3 Shastas Bar & Grill at the hotel on Tuesday May 3<sup>rd</sup> after the first day of the Summit. Here is the booking link: [Shasta College Erosion Control](#). Book your room by 4/18/2016- note the extended date!

## PRESIDENT'S MESSAGE CONTINUED

IECA Region 1 announced the consideration of a plan to realign Chapters to coincide with EPA Regions. For the Western Chapter, this could potentially mean the addition of some Pacific Islands to the Chapter area. Before this can occur, the Chapter will need to re-examine and possibly amend its Articles of Incorporation and Bylaws. The Board will keep the membership apprised if this proposal continues to move ahead.

IECA Region 1's new Executive Director, Sharan Wilson, is fully on board in Denver, and has brought in a bunch of new ideas and plans, many of which are already being implemented. She has also been proactively networking with the Chapters to define the needs and direction of the organization. The Western Chapter has proposed an analysis of membership categories, with emphasis on a category for large group memberships. With large group memberships, a company or agency could write a single check per year and then provide IECA and Chapter membership benefits to a block of its employees. Western Chapter believes this approach will make it more efficient for agencies and companies to provide their employees with the benefits of IECA membership.

The Western Chapter Board, at its March 2016 meeting, adopted a budget showing a small amount of positive net revenue. Getting to this budget required assessment of priorities and some strategic cuts. The good news is that most of the Chapter's traditional events and services will continue.

Western Chapter upcoming events include the Chapter Scholarship Program, a late-summer or early fall technical event, and we're in the early planning stages for a Chapter Conference in 2017.

As you can see, the Western Chapter has a lot going on, but can do even more with member support. If you have ideas for Western Chapter events and/or if you are interested in volunteering, please drop me an email or give me a call.

Best regards,

Jeff Endicott, PE, BCEE, CPESC  
 President, Western Chapter International Erosion Control Association

## EARN 12 PDH CREDITS – EXHIBITOR OPPS!

## CONTRACTOR SPOTLIGHT

### KAZ ASSOCIATES ENVIRONMENTAL SERVICES

This quarter the WC-IECA is happy to introduce long time WC-IECA member Sean Kazemi, Principal of [Kaz & Associates Environmental Services](http://www.kazandassoc.com).

Sean brings ten years of industry experience in Construction General Permit compliance, construction-related water quality problems, project management, and best management practices. He says he has attained a lot of his training through field *experience* and a lot of training at IECA events. Sean still relies on the IECA to stay up to date with new storm water technologies, industry regulations changes and the training the IECA provides.

Working in the storm water field since 2002, he has expertly provided clients with permit compliance and common sense education in order to minimize potential monetary impacts from construction sites protecting the environment. A devoted steward of the land, he believes in educating others about simple changes they can incorporate into their lives to improve the world for future generations.

Sean holds a degree in social science with an emphasis in history & environmental science. He is a state certified QSD/P, a Certified Professional in Erosion and Sediment Control (CPESC) and a Certified Erosion, Sediment and Stormwater Inspector (CESSWI). He is also certified in air pollution, emission control, and dust control and is continuing his education related to horticulture and natural resource management, and is a valued member of the Western Chapter of the IECA.

Contact info: 538 Stone Road, Suite I  
Benicia, CA 94510  
Email: [m.kazemi@kazandassoc.com](mailto:m.kazemi@kazandassoc.com)

## PROFESSIONAL LISTINGS

**JL STORM WATER CONSULTANTS, INC.** is a State Certified SBE/DBE/WBE/UDBE Company. [www.jlstormwater.com](http://www.jlstormwater.com). Jane Ledford, Principal, [jane@jlstormwater.com](mailto:jane@jlstormwater.com) or (619) 922-6511. Services include: Environmental Permit Preparation, Processing and Compliance, SWPPP Preparation and Processing, SWPPP Implementation, SWPPP Inspections, SWPPP Training including the newly adopted Construction Storm Water Permit, Trainer of Record for the QSP/QSD classes, Construction Monitoring, Biological Resources Monitoring, Cultural Resources Monitoring, Coordination with Native American Monitors, English-Spanish Translation of Worker Education Materials.

**SUSTANE NATURAL FERTILIZERS** - For over 30 years of continuous operation, Sustane Natural Fertilizer, Inc. has produced the highest quality Natural Based and Organic Fertilizers and Soil Amendments distributed in the U.S. and exported to 50 countries worldwide. [Sustane](http://www.sustane.com) Natural Fertilizer maintains and operates its U.S.E.P.A. permitted compost site, manufacturing facility and corporate offices from Cannon Falls, MN. Sustane Fertilizers and Soil Amendments provide readily available, balanced nutrition with beneficial microbiology to provide the basic soil components for exceptional plant establishment and long term sustainability. Call (800) 352-9245 to speak with a Sustane Regional Specialist or with our International Team Leader.

**PACIFIC COAST SEED** is Northern California's premier supplier of CA native grasses and wild- flowers, turf grass seed, and other erosion control materials such as fertilizers, mulches, and soil amendments. We provide seed and other materials for diverse applications including restoration, reclamation, revegetation, ornamental landscaping, and erosion control. We offer specialty seed collection from site-specific sources. For more information checkout our website [www.pcseed.com](http://www.pcseed.com) or contact us at (925) 373-4417 or [info@pcseed.com](mailto:info@pcseed.com).

**LINWOOD SUPPLY, INC.** is your distributor of BMPs for Erosion Control and Storm Water Management offering Erosion Control Blankets, TRM products, Fiber Rolls, netting, HydroFiber™, Soil Polymers, dust controls, fertilizers, seed, manmade and natural chemistries, and generally providing you with the kind of service and professionalism you deserve. Linwood Supply, Inc. is a certified small Business based in California, a member of the International Association of Hydroseeders, and a proud member of the Western Chapter IECA. If Your Storm Water is as Clear as Mud™ - Please call us at (707) 678-5087 or visit us at [www.linwoodsupply.com](http://www.linwoodsupply.com).

**MARVIN E. DAVIS & ASSOCIATES, Inc.** focuses on the challenging issues of the Tahoe Basin and Northern Nevada / California terrain. Our professionals provide a diverse and solid background in geotechnical engineering; specialized engineering design; erosion control services; construction and forensic inspection services and materials testing; and, regulatory and compliance issues to enable project approval. Phone (775) 853-9100 or visit us at [www.mdageotechnical.com](http://www.mdageotechnical.com).

**KELLEY EROSION CONTROL, INC.** established in 1983, recognized throughout Nevada and California as a leader in the industry. KEC has an excellent reputation known for quality, competency, solutions, innovative ideas, cutting edge technology, excellence, and client satisfaction. Services include: hydroseeding, site preparation, dust control applications, BMPs, storm water pollution inspection and monitoring, revegetation and project maintenance, site winterization, wetland mitigation, stream channel stabilization, planting and irrigation, mining reclamation, soil stabilizer applications, biotechnical applications, fire restoration/rehabilitation, water quality, turbidity control & pH sampling for SWPPP requirements. Contact - Claudia Chambers CPESC, CISEC, QSP, [claudia@kelleyerosioncontrol.com](mailto:claudia@kelleyerosioncontrol.com), phone (775) 322-7755. Visit us at [www.kelleyerosioncontrol.com](http://www.kelleyerosioncontrol.com).

**EARTHSAVERS EROSION CONTROL PRODUCTS** is the home of the "Original Rice Straw Wattle". Our certified weed free wattles have been tested for sediment retention at San Diego State University and proven in field studies by Caltrans and numerous other agencies. [Earthsavers](http://www.earthsavers.com) wattles are available in 3 diameters, photodegradable netting or 100% biodegradable burlap. Additionally, Earthsavers is a master distributor for a full line of erosion & sediment control products, geosynthetics and more. Our network of distributors provide local access to premium BMP's and Earthsaver's experienced staff can provide superior technical support to our distributors and their customers and specifiers.

**NEDIA ENTERPRISES** manufactures a complete line of erosion control, sediment control, and bioengineering products made primarily from natural fibers. Committed to the conservation of the environment, we are constantly striving to develop products that contribute to its enhancement and protection. Our products are subject to stringent quality control measures that meet or exceed industry standards. [Nedia](http://www.nedia.com) offers sound technical advice on product selection and installation with a thorough understanding of the benefits and limitations of the products. A large inventory of products in several distribution centers across the country facilitates cost-effective and timely delivery of our products. Contact 888-725-6999 or email [info@nedia.com](mailto:info@nedia.com).

*Well, here is a chance to **get targeted exposure** – contact Cyndi Brinkhurst at (530) 272-2407 or at [westernchapter@gmail.com](mailto:westernchapter@gmail.com) to reserve your ad space today!*

### GREAT JOB!

*Is your project going great? Did someone do a good job? Do you have a technical article, regulatory update, contractor to highlight or event announcement you'd like to share with your fellow members?*

*Please forward articles to the [westernchapter@gmail.com](mailto:westernchapter@gmail.com) and we'll publish them in the next issue of Western Chapter News! Thank you!*
