

## **Immediate Opening**

### **Civil or Environmental Engineer – Water Quality Services Division Colton, California (Corporate Headquarters)**

**CASC Engineering and Consulting** is seeking a Civil or Environmental Engineer to join the firm's Water Quality Services Division. The successful candidate will be one that is anxious to demonstrate a combination of technical, task/project management, and leadership skills that lead to the continued growth and success of the firm, the Water Quality Services Division, and the individual.

#### **Minimum Requirements:**

- ◆ BS Degree in Civil or Environmental Engineering.
- ◆ Engineer-in-Training Certification.
- ◆ Two to five years of experience providing engineering services.
- ◆ Excellent verbal and written communication skills.
- ◆ NPDES storm water experience covering three or more of the following areas.
  - Municipal services (plan checking, inspections, support services).
  - Storm water monitoring using automated and grab sampling techniques.
  - Post-construction water pollution controls.
  - Construction site storm water management, including SWPPPs.
  - Industrial site storm water management, including SWPPPs.
  - Municipal storm water management.

#### **Desirable Attributes:**

- ◆ Registration as a Professional Civil Engineer.
- ◆ CPESC, CPSWQ, or CESSWI Certification.
- ◆ QSD or QSP Certification.
- ◆ AutoCAD experience.
- ◆ Interest in challenging assignments in a casual, but serious, work environment with plenty of room to grow.

**CASC Engineering and Consulting** is a diversified organization serving clients in the government and private sectors. The firm encourages employees to maintain a work-life balance and provides traditional employee benefits.

Interested candidates may email (preferred) or mail their resume. All inquiries will be treated as confidential.
